SUMMARY

CRM automation engineer with 2+ years building, integrating, and stress-testing enterprise-grade production systems on GoHighLevel. Delivered 50+ client deployments, led development teams of 10, and maintained zero post-launch failures across health, real estate, and solar verticals. Combines a builder and tester mindset — capable of architecting automations and validating them end-to-end with SQL and structured QA. Currently expanding into Salesforce and systems design.

TECHNICAL SKILLS

CRM & Automation: GoHighLevel (GHL), Salesforce (learning), Zapier, Make.com, Pabbly, GHL Marketplace integrations

AI & Chatbots: GHL ChatBot, Conversation AI, Voice AI, Fuze AI, Assistable AI, Retail AI

QA & Testing: Manual QA, Functional, Regression, Smoke, Sanity, UAT, Cross-browser testing; JIRA defect tracking

Web & Integrations: WordPress-to-CRM, Payment Gateways, Booking Systems, A2P SMS/Email compliance, Figma-to-GHL builds

Data & Databases: MySQL, Backend data validation using Postman, Dashboard accuracy testing

Workflow: Agile/Scrum, Sprint planning, Test summary reporting, Technical documentation, Stakeholder communication

EXPERIENCE

DynamicPro Technology Solutions

Kolkata, India

Senior GHL Developer

December 2025 – Present

- Developed and launched **50+ funnels and websites** across real estate, health, and solar verticals with custom forms, quizzes, and conversion-focused layouts.
- Deployed GHL-native **ChatBot, Conversation AI, and Voice AI**; integrated 3rd-party AI tools (Fuze AI, Assistable AI, Retail AI) extending platform automation beyond default capabilities.
- Implemented **15+ cross-platform integrations** via GHL Marketplace, Zapier, Make.com, and Pabbly, fully eliminating manual data handling across client tech stacks.
- Managed a **team of 10 GHL developers**: task allocation, delivery tracking, quality oversight, and on-time handoffs across concurrent multi-client projects.
- Handled client discovery calls, translated business requirements into GHL specifications, and served as primary technical stakeholder contact.

Scriptures®

Kolkata, India

Senior Virtual Assistant (GoHighLevel Specialist)

June 2025 – November 2025

- Onboarded **4–8 agency clients end-to-end** per month within **1–2 week** delivery windows via structured discovery-to-configuration workflows.
- Built **10–20 automation workflows and conversion funnels** per engagement; executed **6–10 WordPress-to-GHL integrations** with pre-launch QA — **zero post-launch failures** across all accounts.

DynamicPro Technology Solutions

Kolkata, India

GHL Developer & QA Engineer

May 2024 – June 2025

- Planned and performed **300+ test cases per sprint** covering functional, regression, smoke, sanity, and UI/UX testing; ensured **zero unresolved bugs** before every production deployment via JIRA.
- Validated CRM workflow logic and data accuracy against business requirements before every release; supported UAT cycles with product and development teams.
- Configured and launched **A2P-compliant email and SMS campaigns** across 5 client sub-accounts, eliminating compliance risk and improving engagement consistency.

KEY PROJECTS

Active Solutions | Enterprise GHL Build, AI Automation & Sub-Account Management

5+ months

- Oversaw **Phase 1** end-to-end GHL configuration across **50+ client accounts**: pipelines, calendars, custom fields, product setups, memberships, and course builds tailored per client business model.
- Translated **Figma designs and complex templates** into pixel-accurate GHL funnels and landing pages with embedded automation logic from day one.
- Deployed **Conversation AI and Voice AI** across all accounts with intelligent response flows for lead qualification and customer engagement; administered **A2P approval** and all third-party integrations end-to-end.
- Mentored Indian dev team of **6–10 GHL developers**: task allocation, delivery tracking, QA oversight, and on-time handoffs across the entire engagement.
- Provided **Phase 2** post-launch support: complex workflow debugging, bug resolution, automation troubleshooting, and CRM performance monitoring across the full 50+ client base without disrupting live operations.

Leads Up AI | CRM Development, AI Integration & Marketing Automation

6–12 months

- Onboarded and configured **7–10 client accounts** on GHL end-to-end; built **10–20 funnels/landing pages** and **20–30 automation workflows** covering email, SMS, pipeline progressions, and full lifecycle automation.

- Integrated **3–4 AI tools** into GHSL workflows for lead qualification and response automation; connected payment gateways, booking systems, and external APIs for complete CRM functionality.
 - Secured **zero post-launch issues** across all accounts through QA-enforced release process: workflow testing, automation validation, and integration checks before every go-live.
 - Mentored **5+ Virtual Assistants**: task delegation, QA oversight, client communication, GHSL analytics, and campaign optimization.
- Zenoti** | *Manual QA, SQL Data Validation & CRM Testing — Health & Wellness SaaS* QA Engagement
- Designed and carried out **200+ test cases** across Appointments, Customer Management, POS, Billing, and Memberships modules; covered functional, regression, smoke, sanity, and cross-browser testing.
 - Used **SQL to validate dashboard accuracy** — cross-checked lead data, revenue breakdowns, and visualization charts against database records to confirm full data integrity between front-end and underlying source.
 - Logged and tracked **50+ defects** in JIRA covering critical bugs, data mismatches, and UI/UX inconsistencies across 3 browsers; established full defect traceability through re-test and regression cycles.
 - Supported UAT by preparing test data and resolving production-like issues; delivered sprint test summary reports to QA leads and stakeholders across Agile ceremonies.
